

## Presenter:

Judith Maginnis Kuster, CCC/SLP is a professor at Minnesota State University, Mankato, in the Department of Speech, Hearing and Rehabilitation Services where she teaches courses in phonetics, counseling and communication disorders, stuttering, and research using the internet. She has an MS in speech-language pathology from the University of Wisconsin, Madison and an MS in counseling from Minnesota State University, Mankato. She is a Board Recognized Fluency Specialist.

Among her Internet activities are an extensive Internet Guide (Net Connections for Communication Disorders and Sciences), the ASHA Leader Internet, a major database on stuttering (The Stuttering Home Page), and hosting an annual online conference each October in conjunction with International Stuttering Awareness Day.

Kuster is an ASHA Fellow, has published numerous articles on Internet resources for SLPs and audiologists and has written a regular column for ASHA since 1995. She has presented extensively about the Internet in the US and abroad, including being awarded a Fulbright Senior Specialist opportunity in Bulgaria, focusing on the counseling needs of individuals who stutter. Her work on the Internet has been recognized by the American Speech-Language-Hearing Foundation with the 1996 DiCarlo Award for recent clinical achievement, the 2003 Distinguished Contributor Award from the International Fluency Association and the 2007 Outstanding Contribution Award from the International Stuttering Association, the 2008 Distinguished Service Award from the American Speech Language and Hearing Association

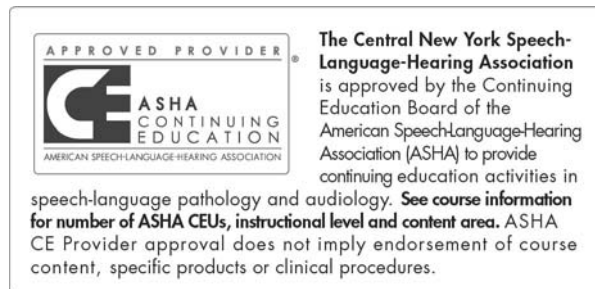

## Agenda

- 8:00-8:30: Registration
- 8:30-10:00: Searching the invisible and visible web - quickly and responsibly
- 10:00-10:15: Break
- 10:15-12:00: Search strategies, continued.
- Discussion forums and locating people
- 12:00-1:00: Lunch
- 1:00 - 2:30: Discussion forums and locating people, continued. Therapy applications
- 2:30-2:45: Break
- 2:45-4:00: Therapy applications, continued.

### Learning outcomes

The participants will be able to:

1. identify search strategies to find information and materials quickly and responsibly, on both the invisible and visible web
2. identify ways to connect with professional colleagues
3. identify how to access and utilize a variety of therapy materials available on the Internet

This program is offered for 0.6 CEU's  
(Intermediate level; Professional area).

## Program summary

This session will demonstrate practical ways of how to find the most reliable information for our clients and their families, evidence-based treatment resources, and creative ways to use Internet resources for therapy to save time and money in the day-to-day work as a speech-language pathologist or audiologist. Information and materials presented can be applied to any caseload and used in therapy immediately by demonstrating how and where to find connections with other professionals, and strategies to access a wealth of materials that can benefit clients and their families. It will feature information on both the visible and invisible web and how to find relevant and reliable professional information. Specific clinical applications will be demonstrated. Therapy applications will address materials freely available on the Internet which can be adapted to any caseload in any setting. It will feature:

1. Interactive sites
2. Reproducibles
3. Specific therapy ideas and activities
4. Generators and templates to create therapy materials
5. Software programs
